

UNIVERSAL PRIMER-FREE MEMBRANE

NEW!
INSTALL DOWN TO
-20°F (-28°C)
WITHOUT THE NEED
FOR A PRIMER

Can be used as a thru-wall flashing, full wall waterproofing, sealing skirt board-foundation to wood frame interface, ICF waterproofing and as an air and vapor barrier

The damaging effects of air and moisture can infiltrate all areas of a building's structure. In the past to prevent this, a specific product for each individual application was necessary with each requiring a primer. With Protecto Wrap's Universal Primer-Free Membrane, one product can protect the entire structure AND **without the need for a primer.**

This high performance thru-wall flashing tape is designed to be applied down to -20°F (-28°C) without the use of primer or mechanical fasteners on most substrates. It's also specifically designed for use as a thru-wall flashing, full wall waterproofing membrane, seals skirt board-foundation to wood frame interface, ICF waterproofing membrane and as an air and vapor barrier.

Saves time and money by eliminating the need for priming

FEATURES & BENEFITS

- Compatible with and will adhere to most construction surfaces, wood, concrete, CMU block, OSB, plywood, glass mat exterior sheathing products, foam insulation board, ICF and metal
- Utilizes Protecto Wrap's Primerless Super Stick Technology
- 6 month exposure rating
- Fully adhered system down to -20°F (-28°C)
- Seals around properly installed fasteners
- Can be applied to damp surfaces
- Meets or exceeds AAMA 711-07 requirements
- IAPMO ER #362 and "Class A" fire rating
- No VOC's, HFCC's, nor CFC's
- Forms a positive air/vapor barrier
