Protecto LWM200 Liquid Waterproofing Membrane

*Protecto Wrap Introduces Liquid Waterproofing Membrane
for Window and Door Openings*

Denver, CO — Protecto Wrap Company, manufacturer of premier waterproofing and energy saving building products, has introduced Protecto LWM200, a non-hazardous, environmentally friendly, elastomeric polymer dispersion waterproofing membrane for window and door openings.

Protecto LWM200 Liquid Waterproofing Membrane is the latest in a series of premium moisture protection building products by Protecto Wrap Company. Protecto LWM200 is an advanced water-based non-bituminous, aqueous polymer dispersion coating that is specifically designed for the demanding requirements of waterproofing window, door and CMU openings.

Protecto LWM200 Liquid Waterproofing Membrane is approved as a waterproof coating for all types of window, door and CMU openings and is compatible with most commonly used building and window substrates, OSB, plywood, CMU, vinyl, aluminum, DensGlass Gold®, treated lumber and various foam insulated products. This new liquid membrane product has seen success in applications for residential and commercial construction.

Protecto LWM200 Liquid Waterproofing Membrane may be applied with a brush, roller or airless sprayer without dilution. No primer is required and a one coat 30 mil wet application is all that is necessary. Coverage is approximately 60 square feet per gallon depending on the porosity of the substrate and climate conditions. Protecto LWM200 Liquid Waterproofing Membrane will stop water leaks in non-structural cracks and allows for easy reapplications and repairs.

Protecto LWM200 Liquid Membrane keeps moisture from door and window openings and helps reduce potential mold growth. Protecto LWM200 Liquid Waterproofing Membrane can be used directly on damp openings and can be applied completely around the opening. This odorless water resistant coating dries tan and can be painted any color.

Protecto CMU100, Water Resistant Coating is also available. This product is specifically designed for CMU applications.

To find out more about how Protecto LWM200 can help preserve your building project or find a dealer close to you, contact Protecto Wrap at 800-759-9727.

Protecto Wrap Company has been manufacturing waterproofing membranes since 1952 and has built a sound reputation for producing the highest quality materials available on the market today. Their peel and stick waterproofing systems are used to waterproof and weatherproof residential and commercial buildings from the footing of the foundation to the peak of the roof. Their extensive line of products include rubberized asphalt, butyl and pressure sensitive adhesives on all their flashing and waterproofing membranes. Visit their new website at www.protectowrap.com.
